# The Swiss Army Knife for Hi-Fi lovers: full-option audio equipment with a high power output.

## WIFI

The Wi-Fi radio of the future! Wi-Fi radio gives you access to thousands of radio stations all over the world – crystal clear, and in stereo over the internet. Connect to any hotspot and listen to local world radio or the latest podcasts with just one push of a button. Especially great for workshops with a hotspot but with poor DAB+ reception.

## FM RADIO

FM radio is here to stay! Whereas DAB+ radio reception can be tricky in large buildings or remote areas, there's always good old FM to back you up. Problem solved – as all our radios have FM capabilities.

## FM RADIO

## DAB+

The genuine 21st-century digital radio, as clear as a bell and as user-friendly as it gets. If there's no coverage, you can simply switch to trusty old FM.

## WLAN-MODULE

The Audisse is the first job site radio that can be played on the Internet at the touch of a button. Radio can be received worldwide via the Internet. Particularly useful when there is no DAB + signal, but a WiFi hotspot.

## AUX IN

Need a break from radio? All you need is a basic audio cable to connect any device with a headphone jack and play it on your PerfectPro radio.

## CALL SPEAKER

A built-in microphone allows you to turn your radio into a call speaker – convenient for when you need to take a call but don't want to interrupt your work.

## POWERBANK

Our radios are equipped with strong batteries which can double as power banks with 5V/1.2A output. Connect the phone to the USB port and it will be charged in no time.

## USB

Download your favourite playlists to a USB stick and play them directly on your radio. This means no fiddling around with phones or other devices when you simply want to listen to your favourite playlists.

## BLUETOOTH

Transform your radio into a high-quality Bluetooth speaker and listen to your own audio thanks to the Bluetooth interface. You can play anything from your computer or phone directly on your radio.

Long, wireless  
playtime and high  
power output
